

DOCK'N'LOCK™ POSITIONING TECHNOLOGY

Freedom Lifts are the only products on the market that feature the **patented self-guiding** (automatic or mechanical*) **Dock'N'Lock™ Docking Systems**.

It's as simple as mounting a docking plow to the bottom of your mobility product. Once installed, when you drive or walk your power chair (or scooter) onto the lift platform, it automatically locks itself into position using the Dock'N'Lock "spring-clamp" locking system. The Tracker Series features the powered automatic Dock'N'Lock for use with both power chairs and some scooters. **Both methods are the fastest, safest, and most secure docking methods available in the industry today.**

(Available on the Tracker™, Tracker XT™ and Car-Go-Mate™ 350-P)

**The mechanical system is for use on power chairs only, shown above on the CGM-350P hitch-mounted lift.*

When you choose a Freedom Lift product, you receive the best your money can buy. Freedom lifts are engineered and designed with **exclusive patented features** that provide safety, security, and are fast and easy to use. Every product is **Made in the USA** and backed by our **Limited Lifetime Warranty** – **the best offered in the industry!**

Freedom Lift products will make your life easier while you're enjoying a whole new level of independence.

About the Tracker Series

The Tracker™ and Tracker XT™ and the industry's premier inside van and SUV lifts. Both offer safety, security, and ease-of-use.

Enjoy the easy, drive-on lifting platform and choose from two docking system options: the **Tie-down Strap** method or the **patented, self-guiding Dock'N'Lock™ Docking System**. The Dock'N'Lock automatically clamps your power chair or scooter safely to the platform as soon as you drive onto the lift. It's that simple. For your safety, we have installed a **green safety light** that lights when the power chair is secure on the lift and ready to be stowed inside your vehicle for safe transportation.

Both the Strap-Tie system and the Dock'N'Lock systems provide flexibility in docking the mobility product. The Tracker series comes **standard with TWO wireless hand-held remote control key chains and one hard-wired pendant remote INCLUDED FREE!**

Vehicle Specifications

	Tracker	Tracker XT
• Maximum Lifting Capacity	350 lbs.	350 lbs.
• Lift Platform Dimensions	44" x 27"	44" x 27"
