

DOCK 'N' LOCK™

POSITIONING TECHNOLOGY

Each Freedom Seat utilizes the patented front or rear DOCK 'N' LOCK system which provides for a safe securement of the Freedom Seat to the track mechanism. (See above diagram.)

Freedom Lifts are the only products on the market that feature the **patented self-guiding** (automatic or mechanical*) **Dock 'N' Lock™ Docking Systems**.

With Freedom Lift, it's as simple as mounting a docking plow to the bottom of your mobility product. Once installed, when you drive or walk your power chair (or scooter) onto the lift platform, it automatically locks itself into position using the Dock 'N' Lock locking system. The Tracker Series features the powered automatic Dock 'N' Lock for use with both power chairs and some scooters. **Both methods are the fastest, safest, and most secure docking methods available in the industry today.** (Available on the Tracker™, Tracker XT™ and Car-Go-Mate™ 350-P)

**The mechanical system is for use on power chairs. For more information, please refer to the Dock 'N' Lock Brochure, available at your local dealer.*

Freedom Lift Corporation manufactures products that keep people mobile despite their disabilities. Our mission is to develop innovative products that meet the ever-growing needs of our customers. It's that simple and it is our passion.

When you choose any Freedom Lift product, you receive the best your money can buy. Freedom lifts are engineered and designed with exclusive patented features that provide safety, security, and are fast and easy to use. Every product is Made in the USA and backed by our Exclusive Warranties – the best offered in the industry!

Freedom Lift products will make your life easier while you're enjoying a whole new level of independence.

We Make Mobility Products Mobile

Live Life. Better.

The FREEDOM SEAT™ is a fully articulating seat mechanism that allows you to independently enter or exit your vehicle at will and with ease. It moves forward, backward, rotates right and left, and extends outside the vehicle, all at the touch of a button. Easily installed in a wide range of vehicles, the Freedom Seat is available in four different models.

FS-2200 shown in a '06 Cadillac DTS

FS-2200 is a rotate-and-extend seat for sedans and crossover vehicles and can be installed on the driver or passenger side.

FS-4130 shown in a '05 Dodge Grand Caravan

FS-4130 & FS-4240 are ideal for minivans and provides easy entry into the mid-row door. (See middle panel.) **Both models are ATRS READY.**

FS-3100 lowered for entry on a '06 Ford F150.

FS-3100 for pick-up trucks. When activated, the Freedom Seat smoothly rotates, extends and ascends or descends in-to or out-of the vehicle so you are perfectly positioned on the ground or behind the wheel.

FS-3200 passenger seat shown in a '05 Dodge Grand Caravan

FS-3200, FS-3300 & FS-3400 offers you the flexibility to enter from the front passenger position using an after-market seat, or from the mid-row using the original or after-market seat.

How the Freedom Seat Works:

Models 4130 & 4240

1. The individual transfers to the Freedom Seat and takes the pendant remote control in hand.

2. At the press of a button on the pendant control, the Freedom Seat raises and retracts into the mid-row door entry.

3. Once inside the minivan the seat articulates into a forward facing position.

4. The individual is now fully placed inside the vehicle.

5. The Freedom Seat moves forward.

6. The freedom seat is securely docked in the driver position behind the wheel using the Dock'N'Lock™ safety docking system.

Features & Benefits

- **All Freedom Seats are non-invasive and won't damage your vehicle when installed.** You now have the freedom to lease almost any vehicle for use with a Freedom Seat.
- **Crash tested and certified to meet applicable Federal Motor Vehicle Safety Standards (FMVSS 207, 208 & 210)**
- **Comes equipped with manual back-up system**
- **Use original equipment seat or after-market seat available.** The Freedom seat utilizes all safety systems when using the original factory seat and vehicle. You can still enjoy all of the safety, features, comfort and aesthetics of the factory-installed seat. Our certified Freedom Seat dealers will remove the seat, make necessary modifications, then re-install it back into your vehicle.
- **Freedom Seats are backed by the BEST WARRANTY in the industry, and manufactured and engineered in the USA.**
- **The Freedom Seat is ATRS READY.** ATRS (Automated Transport and Retrieval System) is a revolutionary transportation mobility solution that will change the lives of those who use it. With the use of robotics and a automation technology, ATRS enables an individual in a power wheelchair to transport themselves into and out of their vehicle, then it self-guides the powerchair to the rear of the vehicle, onto the lift and into the cargo area. ATRS offers a new level of independence for those who use it.
